

Rawia Ahmed

Technical Team Lead | Senior Frontend Engineer (Angular, React, NodeJS)

El-Gouna, Red Sea, Egypt | +20 114 681 6040 | rawia.emam91@gmail.com

linkedin.com/in/rawia-ahmed-3b372733 | Arabic (native) | English (C1)

Hands-on Technical Team Lead and Senior Frontend Engineer with 13 years of experience delivering scalable, high-performance enterprise applications in Angular and TypeScript, including a retail media platform of around 250,000 lines across 247 components. Leads and mentors a cross-functional team of 8 to 10 engineers, owning the full delivery lifecycle from PRD review and technical architecture through code review, testing, and production deployment, with a zero QA rejection rate sustained since 2022. Strong background in enterprise B2B platform modernisation, monorepo consolidation, CI/CD, and cloud migration. Uses AI-assisted development tooling daily in production delivery, reviewing generated output with the same rigour applied to any pull request. Open to senior engineering and tech lead roles, either fully remote or with relocation, bringing long-term cross-border remote collaboration experience and C1 English.

Work Experience

Technical Team Lead, Front-End Focused

07/2022 – 08/2026

Intouch.com | Ireland (remote from Egypt) | Retail media and digital-out-of-home advertising platform

- Lead a cross-functional team of 8 to 10 engineers to a zero QA rejection rate sustained since 2022, owning the full delivery lifecycle from PRDs and architecture through code review, testing, and production deployment.
- Consolidated 2 enterprise Angular applications into a single workspace sharing 1 shared component library and codebase, eliminating logic that had drifted between separate repositories.
- Architected contract-first integration with 10 backend services, generating typed API clients from OpenAPI specifications so client and server contracts cannot drift silently.
- Built role-based access control across multiple tenant types using Azure AD and MSAL (OAuth2/OIDC), with route guards, per-feature permissions, and feature flags for staged rollout.
- Accelerated releases from every few months to at least monthly, shipping 197 versioned releases with same-week fast-track fixes.
- Introduced Angular Signals and standalone components into a large RxJS codebase, defining the migration path and patterns for incremental adoption.
- Improved load performance through lazy loading, bundle size reduction, and OnPush change detection tuning across the monorepo.
- Delivered a client-facing feature under a hard deadline using AI-assisted development, generating the design through Figma MCP and implementing with Cursor, reviewing every generated line before merge.
- Established frontend engineering standards: ESLint and Prettier enforced at zero warnings, conventional commits with automated semantic versioning and changelogs, pre-commit hooks, and Cypress end-to-end tests running in Azure Pipelines.
- Mentor 8 to 10 engineers through bi-weekly 1:1s, structured code review, and pairing, owning performance reviews, career development, and hiring decisions.
- Evaluated Module Federation for micro-frontend architecture during monorepo consolidation, defining shared dependency and routing trade-offs before selecting a monorepo approach.

Senior Fullstack Web Developer

07/2018 - 06/2022

Intouch.com | El-Gouna, Egypt

- Joined as the 3rd technical hire; established engineering practices from scratch, including QA processes, CI/CD pipelines, and infrastructure, and helped interview and hire the growing engineering team.
- Designed and implemented the company's first CI/CD pipelines with Azure DevOps, before a dedicated DevOps team existed.
- Migrated the platform from AWS to Azure and re-architected workloads onto serverless functions, completing the full migration in under 3 months without service disruption.
- Built and maintained RESTful APIs and BFF services using Node.js and NestJS, serving 5 to 6 consuming applications across the platform.
- Established the unit testing practice with Karma and Jasmine, introducing the test suite and coverage reporting the platform still runs on.

Senior Front-End Developer

02/2018 - 07/2018

247Labs | Cairo, Egypt

- Delivered responsive, cross-browser Angular single-page applications with Bootstrap and SCSS, translating UX/UI wireframes into interactive production interfaces.

Senior Front-End Web Developer

01/2017 - 01/2018

HPE (DXC) | Cairo, Egypt

- Built a data-dense Angular dashboard for Mercedes-Benz managing factory production lines across German plants, as part of the core development team.
- Delivered bi-weekly progress demos directly to the client, gathering feedback and iterating on requirements.

Front-End Web Developer

09/2013 - 12/2016

Youxel Technology | Cairo, Egypt

- Built the EFG Hermes mobile application for one of the largest financial services firms in the Middle East, delivering Arabic right-to-left interfaces.
- Delivered mobile banking applications for Saudi Arabian banking clients, implementing bilingual Arabic and English UI with full RTL layout support.
- Developed responsive web applications, collaborating across the full product lifecycle.

Technical Skills

Frontend: JavaScript (ES6+), TypeScript, Angular (Signals, standalone components, Angular Material, CDK), React, Redux, NextJS, HTML5, CSS3, Sass/SCSS, RxJS, Web Components, Bootstrap, Tailwind CSS

Architecture: Angular monorepo, Nx, design systems, shared component libraries, OpenAPI contract-first client generation, role-based access control, feature flags, single-page applications (SPA), responsive and cross-browser development, performance optimisation (lazy loading, bundle size reduction, OnPush change detection)

Backend and Cloud: NodeJS (REST APIs, BFF, NestJS), AWS, Azure, Serverless, Azure DevOps CI/CD, Azure AD (MSAL, OAuth2/OIDC), Azure Blob Storage

Testing and Tooling: Jest, Karma, Jasmine, Cypress (E2E), ESLint, Prettier, Husky, lint-staged, conventional commits, semantic versioning, code review, Git, Storybook, Figma

AI-Assisted Development: Prompt engineering, Cursor, Claude, Claude Code, Figma MCP, agentic development workflows, AI code review

Leadership and Personal Skills

Team leadership and people management; mentoring and coaching; performance reviews and career development; hiring and interviewing; Agile and Scrum delivery; prioritisation under competing deadlines; problem solving and ownership; remote and distributed team coordination.

Education

Bachelor's Degree in Computer Engineering

09/2008 - 07/2013

Cairo University | Egypt
